

Annexure X ESS Summary Report

ESS Summary Report

This Summary Report will be prepared for each project proposal/business before submission to the FMC on the basis of the ESS screening undertaken in terms of EIF's ESS Guiding Note and Gender Guide. The M&E Officer or the ESS Specialist (as applicable) is responsible for compilation of this report. Completed relevant Annexures (1, 2 & 3) to the EES Guide and Gender Guide, signed by the relevant EIF officials, must be attached to the summary for reference by FMC, TAP and the Board in the event they need detailed information.

Project Identification

Project title	
Date submitted to EIF	
Geographic location	
Date ESS screening completed	
Name of EIF official who performed the screening	

Project Risk Categorisation

Results of the screening exercise have led to a determination that this project resorts under the following risk category:

Risk Category	Tick	Recommended Course of Action
A		Proposed project activities are likely to cause significant adverse environmental and/or social risks/impacts that are diverse, irreversible or unprecedented. EIF does not support projects in this risk category.
B		Proposed project activities are likely to cause mild adverse environmental and social risks/impacts that are few in number, generally site-specific, largely reversible, and readily addressed through mitigation. Further environmental and social review was therefore undertaken. Mitigation and management measures proposed are summarised below while details are contained in attached annexes.
C		Project activities pose minimal or no adverse environmental or social risks/impacts. Project recommended for consideration. Complete screening report is attached.

Annexure X ESS Summary Report

ESS Summary Report

This report represents a highly summarised overview of detailed information contained in attached Annexures 1 (E&S Risks Screening), 2 (Free Prior Informed Consent) & 3 (Identification of Indigenous Peoples in Project Area). The report applies only to Category B projects.
