DESIGN AND IMPLEMENTATION OF PERFORMANCE MANAGEMENT SYSTEM FOR THE ENVIRONMENTAL INVESTMENT FUND OF NAMIBIA (EIF)

1. Introduction

The Environmental Investment Fund of Namibia (EIF) is an investment fund, set up under the laws of Namibia, with the express purpose of raising financial resources for direct investment in environmental protection and natural resource management activities and projects, which support the sustainable economic development of Namibia. The EIF is not just a fund for financing "conservation activities". It pursues a broader investment portfolio by providing economic opportunities and a stake in the use of natural resources to the poorest sectors of society. The ultimate goal is to improve the quality of life and the economic wellbeing of this sector, thereby reducing the possibilities of them pursuing activities that degrade Namibia's fragile environment and waste its natural resources.

Following approval by the Board of Directors, the EIF is embarking on a new strategic trajectory and is seeking to introduce several measures to facilitate the development of the institution. These include: the restructuring of the organization, a job evaluation exercise, the establishment of sustainable financing mechanisms, and a review of its performance management system. To date the EIF has completed the organizational restructuring exercise and a new five-year strategic plan.

The EIF has recently concluded a job evaluation and reclassification exercises with the view to ensuring that positions are appropriately classified and aligned as well as to eliminate anomalies inherent in the previous organizational structure. The EIF is now seeking the services of external experts (a single consultant or a consulting firm) to assess EIF's performance management needs and to develop a suitable performance management system (PMS) for the institution.

2. Objectives of the Consultancy

The consultancy is aimed at designing a PMS for the EIF that is tailored to the needs of the institution. The consultant will further be required to train and guide EIF's Human Resources Management staff members and the Executive Committee members with the implementation of the final PMS system.

3. Desired Minimum Characteristics of Envisaged Performance Management System

The envisaged PMS is expected to primarily be capable for use in documenting, tracking and measuring staff members' performance in a systematic manner. Secondly, it must serve as a tool provides for taking remedial interventions on time when necessary and serve as a guide in rewarding or sanctioning staff performance as appropriate. Thirdly, the PMS must lend itself for use as a strategic key in human resources and business development of the EIF. Lastly, the system must be compatible with EIF's computerized Sage VIP HR management system or at least lend itself for interfacing with the said system.

The specific characteristic of the anticipated system that this assignment must deliver on are to:

1. Create a basis for several administrative decisions such as strategic planning, succession planning, promotions, rewards system, and a procedure for sanctions;
2. Ensure that the employees' duties are linked to and contribute towards attainment of the mission, goals and results of the organization;
3. Ensure that performance objectives are identified for each employee in order to provide a clear understanding – on the part of both employer and employee - of the quantity and quality of work expected;
4. Ensure the establishment of a process for boosting employees' performance by encouraging employee empowerment, motivation and implementation of an effective reward mechanism;
5. Establish a process for evaluating performance relative to expectations and agreed performance standards;
6. Develop a procedure for addressing incidences of employee performance that fall below expected or agreed standards in terms of quality, quantity or frequency;
7. Establish a process that captures employees' baseline skills and qualifications, systematically identifies skills gaps (versus required performance) with the view of supporting staff development in a systematic manner. This should also lend itself for recognizing and appropriately rewarding personal growth and advancement;
8. Provide a framework for documenting work planning and performance review to facilitate decision making; and
9. Establish and promote a two-way system of communication between the supervisors and the employees for setting performance targets, agreeing on performance standards, clarifying expectations about the roles and accountabilities, communicating the functional and organizational goals, providing a regular and a transparent feedback for improving employee performance and continuous coaching.

4. Scope of Work

Working under the direct supervision of the Head of HR and the CEO, and with occasional inputs from the Executive Committee, the consultant(s) shall undertake specific tasks outlined below. The assignment will not necessarily be limited to these tasks.

4.1. Situational Analysis (Diagnosis)

- Undertake a thorough assessment of the working and work planning environment at EIF.
- Study EIF's HR Policy and all relevant policies and guidelines.
- Study various performance management systems available on the market and identify/select at least 2 options for recommendation to EIF one or two options that best suits the EIF.
